

FIND OUT IF SWITCHING TO GREEN ENERGY CAN SAVE YOU MONEY!

Switching your electricity supply from fossil fuel to renewable energy may save you money, is easy to do and will increase the demand for renewable energy, leading to reduced carbon emissions.

We are offering a free service to see if we can save you money, and reduce your environmental impacts. Here's how this service works:

- 1. Find your latest electricity bill. Call your supplier to find out (a) your consumption for the last 12 months and (b) your exit date if you are in a contract. Also confirm your current tariff – standing charge and price per kWh.**
- 2. Send a copy of this bill, with the information from the supplier written on it, to Fiona Ward at the TTT office (43 Fore Street, Totnes, TQ9 5HN).**
- 3. We will then see if we can find a green energy tariff that will save you money or at least cost no more.**

The more businesses that we do this for, the greater our buying power with green energy providers. This will lead to even better tariffs for everyone. It also makes a great story we can use to get publicity for the town's shops & businesses.

**Available to all Totnes businesses. Offered by Transition Town Totnes in association with Totnes Chamber of Commerce.
